\$5.20

DORFAN AUTOMATIC ELECTRIC CRANE No. 70

No. 70

This miniature crane is the most interesting mechanism to a boy, next to the Dorfan Engine. It operates just as perfectly as a big crane. The horizontal arm can be revolved continuously in a complete circle and can be reversed. The lifting hook

can be raised or lowered. 20 inches high, 19 inches wide; two gear-shift levers; start-stop-reverse; double clutch and worm gear; solid die cast construction. Electric motor controlled; finished in a beautiful combination of colors. Illustration approximately one-fifth actual size. Packed in individual box. Net weight, 11 pounds. Shipping weight, approximately 25 pounds. Shipped completely assembled, ready for operation. Retail price, each

\$19.50 • Can be used with any make of Transformer or Electric Train

DORFAN AUTOMATIC CIRCUIT BREAKER No. 446

The Dorfan Automatic Circuit Breaker shuts off the electric current when a short circuit occurs in operating Toy Electric Trains. The current remains off until the cause of the short circuit is removed. The Dorfan Automatic Circuit Breaker makes it possible for the very young child to play with Electric Toy Trains without any fear of what might happen if the train should jump the track. It makes Dorfan the World's Safest Toy Railway. Dealers are now able to run electric trains in their show windows with absolute safety.

The Dorfan Automatic Circuit Breaker is the cheapest kind of Transformer insurance. This modern improvement should be included in every sale of an Electric Train. **PLAY SAFE**—use the Dorfan Automatic Circuit Breaker No. 446.

Retail price, each

\$2.65
